Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

Application No.

10/505,304

Applicant(s)

REVIE ET AL.

Examiner

Matthew J. Kasztejna

Art Unit

3739

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 27 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 2-18 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 2-18 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 20 August 2004 is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Notice of Amendment*

In response to the amendment filed on March 27, 2006, amended claims 2-3, 5-10; new claims 11-18 and canceled claim 1 are acknowledged. The current rejections of claims *stand*. The previous indication of allowability of claims 5 and 8 is *withdrawn* upon further review. The following new and reiterated grounds of rejection are set forth:

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 5-6, 8-12, 15 and 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gillies et al. (U.S. Patent No. 6,272,370).

**In regard to claims 2, 5, 8-12 and 17-18**, Gillies et al. teach a microcatheter 1 comprised of an elongate shaft with a plurality of MR-visible markers 6 disposed at the distal end to provide easily identifiable reference points for trackability and localization under MR imaging and X-ray fluoroscopy (see Figure 1 and col. 25, lines 39-43). The markers 6 can be formed of radioopaque materials, such as gold, platinum or tantalum, which are more reflective than the copolymer of the shaft 2 of the microcatheter 1 (see col. 25, lines 10-53). Inherent in the disclosure of the use of an MR or x-ray imaging device is the use of at least two receiving devices spaced apart for receiving stereoscopic signals from the markers 6 and a data processor for analyzing the signal

Art Unit: 3739

from the markers 6 and generating information relating to the position and orientation of the microcatheter 1. Gillies et al. disclose the movement of the tip can be actuated by a pusher-wire or guide-wire inserted into the lumen of the implant/catheter and either driven by motor or advanced by hand, as appropriate to the implant's location, direction of movement, and targeted point of delivery. Thus comprising a drive unit for imparting rotational motion to the tool (see Col. 12, Lines 1-25). Furthermore, the tool is inherently a cutting tool as it penetrates tissue to deliver drug substance to a desired target location (see Fig. 1). Also inherent in the disclosure of the use of an MR or x-ray imaging device are the method steps of locating the axis of the shaft 2 of the microcatheter 1 and locating the center line of each marker and as well as identifying 3 generally rectangular areas which represent the markers 6, determining the location of a line on each of the rectangular areas and determining the angle between the lines on adjacent ones of the rectangles (all done within or by the processor that comprises pad of the MR or x-ray imaging device). **In regard to claims 6 and 15**, Figure 1 shows that the planes defined by the axially spaced edges of each marker 6 are parallel to one another and perpendicular to the axis of the shaft 2.

Claims 3, 4, 7, 13-14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gillies et al. (U.S. Patent No. 6,272,370) in view of Ben-Haim (U.S. Patent No. 6,203,493).

**In regard to claims 3, 4, 7, 13-14 and 16**, Gillies et al. teach two markers 6 on the microcatheter 1 (see Figure 1). However, Ben-Haim discloses a similar tracking device for an endoscope comprised of a sheath 20 having a plurality of sensors 22

spaced along the axis of the endoscope (see Figure 1). Furthermore, duplicating the components of a prior art device is a design consideration within the skill of the art. In re Harza, 274 F.2d 669, 124 USPQ 378 (CCPA 1960). Accordingly, it would have been obvious for one of ordinary skill in the art at the time the invention was made to provide the microcatheter 1 with at least three markers 6, in the manner disclosed by Ben-Haim. Furthermore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to provide the microcatheter h of Gillies et al. with a sheath containing the markers 6, in the manner disclosed by Ben-Haim, as Ben-Haim demonstrates that sheaths containing radio-opaque markers for placement over an surgical device are well known in the art.

### ***Response to Arguments***

Applicant's arguments with respect to claims 2-18 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew J. Kasztejna whose telephone number is (571) 272-6086. The examiner can normally be reached on Mon-Fri, 8:30-6:00.

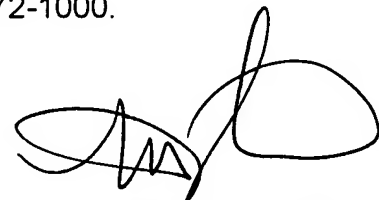

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C.M. Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
